

## Eliminate Errors and Ensure Compliance

### Simplify Your Process

OnSite is the software that provides you with the exact forms and fields you need. No more and no less. All forms are completely customizable for your specific operations.

### Work With Accurate Information

Using paper creates risk and error. Digitizing with OnSite ensures a standardized inspection process with required fields while eliminating the risk of lost paperwork. Are you ready for consistent inspections?

### Streamline Your Operation

OnSite allows you to reduce steps and enables techs to spend more time on what matters. Techs can now complete more work orders and capture important inspection information through images and comments.

## Who Benefits from OnSite?

OnSite helps you make better asset management decisions—on every level.

### Corporate

- Higher accuracy of data capture
- Increase visibility through operation's activities
- Enable knowledge transfer

### Management

- Increase field productivity
- Eliminate unnecessary capital spending
- Easily identify high & low performing assets

### Maintenance

- Increase work order completion
- Eliminate errors associated with paperwork
- Streamline inspection processes

Do you want to eliminate error in your field inspection operations? Call **330.974.0474** or visit **onnowdigital.com** to request an OnSite trial today.
